Welcome

Welcome to our 2022 Responsible Ownership Activity Report, which outlines the engagement, public policy and proxy voting, if applicable, carried out by **reo**[°].

The purpose of our **reo**[°] (responsible engagement overlay) service is to engage with companies held in portfolios with a view to promoting the adoption of better environmental, social and governance (ESG) practices.

The team does this through engaging with investee companies and voting proxies, if applicable on behalf of clients. We also work with the wider investment and policy community to address the systemic sustainability risks facing the economy and financial system. Ultimately, we view engagement not only as a tool to identify and manage ESG risks, but also as a mechanism to create positive impact for the environment and society.

This report sets out detailed information about how we have engaged with companies on your behalf over the past year.

Engagements and Sustainable Development Goals (SDGs)

The 17 Sustainable Development Goals (SDGs) were developed by the UN and cross-industry stakeholders with a view to providing a roadmap towards a more sustainable world.

We use the detailed underlying SDG targets to frame company engagement objectives, where relevant, as well as to articulate the positive societal and environmental impacts of engagement. Engagements are systematically captured at a target level, to enable greater accuracy and achieve higher impact.
